

Manitoba is Hiring Cardiology Technologists

HEALTH CAREERS
MANITOBA

A career as a cardiology technologist can take you anywhere!

Cardiology technologists use a variety of tests – including electrocardiograms (ECG/EKG), exercise stress testing, and Holter monitoring – to record the activity of the heart. These test results are used by the health care team to diagnose, monitor, and treat heart disease.

**Clear
Communicator**

It's the greatest feeling when a patient comes back and they let us know, if it wasn't for you taking me to emergency that day, I wouldn't have got my stents and I wouldn't be here.

To know that because of my profession, because I'm trained to read the tracings on these reports, that someone's mother, father, brother, sister is still around, is very rewarding.

— Nadia, Cardiology Technologist

Role Requirements

- Cardiology technologists spend a lot of time on their feet
- Cardiology technologists are frequently required to lift equipment and position patients
- Cardiology technologists may work with patients who experience medical test anxiety
- Cardiology technologists generally work 8-hour shifts, including days, evenings, weekends, and holidays

Educational Programs

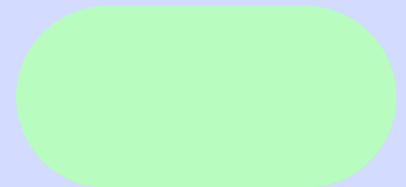

Stenberg College*

- Cardiology Technology

*Stenberg College is located in Surrey, BC. This course is offered in a combined delivery format with online theory and in-person labs and clinicals in Winnipeg.
