

Manitoba is Hiring Medical Radiation Technologists

HEALTH CAREERS
MANITOBA

A career as a medical radiation technologist can take you anywhere!

Medical radiation technologists use radiation and electromagnetism to help diagnose and treat medical conditions. Depending on their education, they might work as radiological technologists, magnetic resonance (MRI) technologists, or nuclear medicine technologists.

Medical radiation technologists also work as radiation therapists and provide treatment to people living with cancer.

“Being a radiology technologist is a great career. We do a lot more than just take pictures. Every day is different. We have the opportunity to see and do so many different things. It’s never boring and it’s always rewarding. I love helping people and for me that’s what it’s all about.

— Trish, Senior Radiology Technologist

Role Requirements

- Medical radiation technologists spend a lot of time on their feet
- Medical radiation technologists are frequently required to lift equipment and position patients
- Medical radiation technologists must follow strict safety procedures to keep themselves and their patients safe from radiation
- Medical radiation technologists may work with patients who experience medical test anxiety
- Medical radiation technologists generally work 8-hour shifts, including days, evenings, nights, weekends, and holidays
