

# Manitoba is Hiring Diagnostic Medical Sonographers

HEALTH CAREERS  
**MANITOBA**

## A career as a diagnostic medical sonographer can take you anywhere!

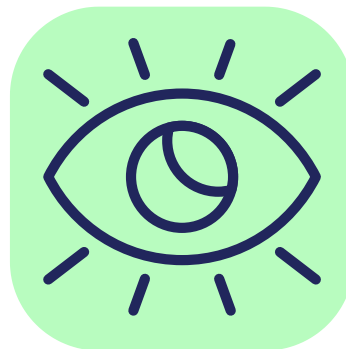

Diagnostic medical sonographers use equipment that sends out high frequency sound waves (also known as ultrasound) to create images of internal structures and organs in the body. These images are used to help the health care team diagnose and treat medical conditions.

**Problem  
Solver**

**Attentive  
to Detail**

**Hand-Eye  
Coordination**

**Empathetic and  
Compassionate**

It's fascinating work. You can see inside the body in a non-invasive way, with no radiation. It's challenging but also really rewarding, especially when you find the reason for someone's pain or illness.

— Madison, Diagnostic Medical Sonographer

## Role Requirements

- Sonographers may need to hold different positions while performing scans and must be mindful of muscle strain
- Sonographers may work with patients who experience medical test anxiety
- Sonographers may be required to travel to provide services in other facilities or smaller rural communities
- Diagnostic medical sonographers work 8-hour shifts, including days, evenings, weekends, and holidays. Some work overnight call shifts.

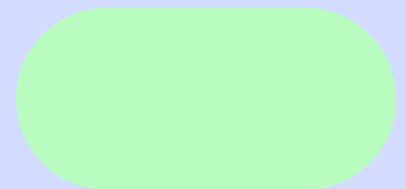

## Educational Programs

### Red River College Polytechnic

- Diagnostic Medical Sonography – Ultrasound
- Diagnostic Cardiac Sonography – Echocardiography
